**IAPMO Seeks Technical Subcommittee Members  
for Development of National Standards IAPMO Z1154 and IAPMO Z1117**

**Ontario, Calif. (Jan. 28, 2020)** — The International Association of Plumbing and Mechanical Officials (IAPMO) is seeking volunteers, with technical background in plumbing and mechanical systems and specific knowledge of press connections and/or shower enclosures and shower/steam panels, to participate on a pair of Technical Subcommittees (TSC). Ideal candidates for the IAPMO Z1117 and IAPMO Z1154 TSCs would include jurisdictional authorities, testing lab and educational facility representatives, and manufacturing experts.

The scope of IAPMO Z1117 covers press connections made with copper or copper alloy fittings and Type K, L and M copper tube; carbon steel fittings and Schedule 10 and 40 carbon steel pipe; stainless steel fittings and Schedule 5, 10, and 40 stainless steel pipe.

The scope of IAPMO Z1154 covers shower/steam panels, enclosures for showers and tub/shower combinations, bathtubs and tub/shower combinations with glass pressure-sealed doors, and floor-mounted showers intended for new and retrofit applications. Each TSC will review the contents of its applicable standard.

The Z1117 and Z1154 TSC members will assist the Plumbing Standards Committee (PSC) with the development of new American National Standards (ANSI) and National Standards of Canada (NSC). The committees will also be responsible for the content and processing of public review comments and operate in accordance with IAPMO's accredited procedures for standards development: [IAPMO PP-1 \(Policies and Procedures for Consensus Development of American National Standards\)](#) and [IAPMO PP-2 \(Policies and Procedures for Development of National Standards of Canada\)](#).

Founded in 1926, IAPMO seeks to be a worldwide leader in the plumbing and mechanical industry through the protection of health and safety. IAPMO develops industry standards with a focus on plumbing products, solar heating systems and components, mechanical products (including heating, ventilation, cooling and refrigeration system products) and products used in the recreational vehicle and manufactured housing industries.

For more than 30 years, IAPMO has developed American National Standards (ANS), initially as the Secretariat for the ANSI Z124 Technical Committee, and since 2005 as an ANSI-accredited standards development organization. On May 10, 2018, IAPMO received accreditation through the Standards Council of Canada (SCC) for development of National Standards of Canada, thus accepting the responsibility for development of CAN/IAPMO-designated standards.

The deadline to apply to either/both committee(s) is March 13. Applications can be downloaded at the following URL: <http://www.iapmo.org/media/5582/application-for-membership-iapmo-tsc-2019-01-31.pdf>

Interested parties wishing to serve, please contact IAPMO Standards at [standards@iapmostandards.org](mailto:standards@iapmostandards.org) with a completed application as well as a copy of your résumé by the March 13 deadline, or you may contact Kyle Thompson at 909-230-5534 with any questions.
